

# TECHNOLOGY

Wycom WyChecks is the ideal solution for credit unions. Powered for the highest-volume environments, it's a simple and secure way to disburse checks from a single location on your network. Whether you use pre-printed stock and wish to automate signing or choose to use secure blank check stock and print full MICR checks on demand, WyChecks offers the perfect solution for your organization!

## WYCOM WYCHECKS DELIVERS:

- GREATER EFFICIENCY:** WyChecks allows for automated signing of your pre-printed checks, or you can even eliminate pre-printed checks! WyChecks can laser print your checks using secure blank check stock. No more check stock control issues or incorrect check numbers. Logo, address, or account number changes can be made easily without having to order new check stock!
- BROWSER-BASED SIMPLICITY:** The browser-based administrator panel is your virtual key to easy, efficient, and secure management of your WyChecks solution.
- SIMPLE SETUP:** Since WyChecks is software-independent and pre-programmed by Wycom, there's no downtime to get started and no time spent learning applications. Connect it to your network, assign login access to authorized users, and you're ready to go! Have access to unlimited check printers as you grow!

Wycom WyChecks is a simple and secure way for credit unions to sign and print checks.

- Turn printers into secure check signers and/or add ability to print using secure blank check stock
- Experience increased security and fraud protection
- Centralized control of all check printing and signing

- **HOSTED OPTION NOW AVAILABLE:** While you can install the WyChecks hardware server on site at your credit union, Synergent can also host this for you. Synergent's hosting service includes performing all release processing, and assuming disaster recovery responsibilities.
- **TREMENDOUS SECURITY:** WyChecks securely stores valuable signatures, logos, check overlays, and user accounts within the WyChecks solution—not on your system. Browser-based login is protected by passwords, and you can allow different levels of access for administrators, supervisors, and users.
- **FRAUD PROTECTION:** Advanced fraud-protection features include forgery-resistant custom graphics for dollar prefixes and amounts, ability to suppress signatures at specified thresholds, and signature background protection.

- **MULTIPLE PRINTER SUPPORT:** WyChecks offers unlimited printer licenses. Adding a branch? Just add your printer to the system and you are ready to go!
- **TEMPORARY/STARTER CHECK PRINTING:** Print personalized starter checks directly from Episys using your WyChecks solution.
- **MERIDIANLINK CHECK DISBURSEMENT:** WyChecks has an additional module to connect MeridianLink programming to any current Wycom solution. This connection can allow for checks to be disbursed directly out of LoansPQ using blank secure check stock with MICR toner in your printer. If you continue to use pre-printed checks, Wycom is ready to help upgrade your installation to full MICR check printing for both Episys and MeridianLink checks.
