

TECHNOLOGY

More banking is done online today than ever, but that doesn't mean credit unions can't provide members with a personal experience.

The Alkami Platform provides financial institutions a complete digital banking solution ready to facilitate both consumer and small business user onboarding, engagement, and account servicing. Clients can enhance the Platform with upgrades and can tailor their experience with additional Alkami and third-party products.

PRODUCT FEATURES

Alkami includes the most essential components for success as part of their standard Platform offering:

- **Continuous Software Delivery** – With a true single-code base and proven multi-tenant system architecture, user needs are anticipated and quickly met so you can adapt and help users stay engaged.
- **Cloud Based** – Fully hosted, secure cloud environment within Amazon Web Services. AWS supports maximum availability and provides industry-leading security.
- **Software Development Kit (SDK)** – Customize digital banking in your own way now and into the future to further differentiate you from your peers.
- **Integrations** – More than 300 integrations on a secure and scalable platform grant you extensibility, powering connections to the future and allowing users to bank anywhere, anytime, simply.
- **Data Management** – Track performance and user engagement through business intelligence dashboards to improve competitiveness and business results.
- **UX** – Deliver personalized and frictionless design that's easy-to-use and establishes lasting connections between you and your users. Alkami's leading App Store ratings prove user satisfaction.

Alkami

The Alkami Platform simplifies money movement, promotes financial wellness, provides deep user insights, and offers seamless integrations for ease of use.

"Alkami is an ideal digital banking solution for credit unions who want the flexibility to customize their platform with product suites and integrated third-party products. Credit unions who choose Alkami are forward-thinking, seeking cutting edge integrations, and view technology as the key tool for growth in the competitive FI space."
