

## PAYMENTS

Are you having a tough time staying up to date on the latest types of fraud that can impact your members? If so, you are not alone. Fraudsters evolve and new scams come to light all the time. But with Federal Trade Commission data showing nearly \$8.8 billion was lost to fraud in 2022—an increase of over 30% year-over-year—it is an area to stay savvy about to protect both members and your bottom line.

Card Risk Office is designed to help protect credit unions and their members from fraud and the impacts of fraud. It centralizes risk management in one place while leveraging the latest technologies and industry expertise to help mitigate losses and keep a positive experience for your members.

### HOW IT WORKS

Expertise meets today's technology to battle card fraud with Card Risk Office. Other than being informed that there is protection in place, members should not notice Card Risk Office unless they are a potential victim of fraud and they are notified as a result. While no one wants to be the victim of fraud, being notified as soon as possible provides protection and peace of mind.

Card Risk Office is not a set-it-and-forget-it product. Our partners at Fiserv have dedicated risk analysts that are part of the Card Risk Office experience. They are here to help manage your card program goals for risk mitigation and to ensure a positive member experience. As evolving fraud trends are analyzed, strategic recommendations are made to you.

This product will become your dedicated virtual risk office, supporting your existing risk management team, being proactive in case monitoring, and helping you address and solve fraud as needed.

### Built to Fit Your Credit Union

Your credit union is unique. To provide the right mix of service for you and your members, we are pleased to recommend two service tiers: Card Risk Office Advisor and Card Risk Office Select.

### KEY BENEFITS

- **Balanced Risk Mitigation Approach:** Achieve a balanced approach to risk management that minimizes negative member impact.
- **Minimize Exposure and Loss:** Reduce card fraud exposure and loss-of-fee income.

Card Risk Office<sup>SM</sup> leverages predictive analytics and decision-management technology to manage and reduce losses from card fraud.

- Minimize negative impacts to members
- Reduce card fraud exposure
- Access a single point of contact for risk management
- Improve member satisfaction

"Fraud continues to evolve. Staying ahead of it to prevent or mitigate fraud is crucial in both protecting members and keeping them satisfied. Card Risk Office is the most comprehensive tool out there, and it conveniently manages your risk office virtually from a single source. This helps your members and staff alike."

- **Rebekah Higgins**  
Vice President – Payments  
Synergent

- **Single Source:** Benefit from a single point of contact.
- **Gain Extension of Your Team:** Gain insights from analysts to proactively catch emerging fraud trends.
- **Access Analysis:** Leverage comprehensive monitoring and reporting services.
