Access Softek

Access Softek Digital Banking provides an integrated, intuitive omnichannel solution across all devices.

- Unified experience across platforms
- Simple transfers and payments
- Easy password solutions
- Data visualization
- Quick installation
- In-app marketing methods

Your members are looking for a unified digital banking experience across every device they use. Providing a digital banking tool that exceeds member expectations can be a differentiator that makes your credit union stand out while delivering a needed, sought-after solution.

Through our partnership, Synergent can connect your credit union with Access Softek's Digital Banking platform, Morpheus, a seamless omnichannel experience for both business and personal account users. Its powerful features include:

Integrated Online & Mobile Platform – Access Softek Digital Banking is built to be mobile aware and takes advantage of the capabilities that are unique to mobile devices. The easy-to-use mobile app, supported for both Apple and Android devices, provides online banking anytime, anywhere.

Money Movement Made Simple – A single-screen provides a central, intuitive location that simplifies how members complete transfers and payments.

Access Softek

Easy Password Solutions – Password issues are the single biggest obstacle users and call centers face. Solve that problem with unique biological identifiers like fingerprint, voice, and facial recognition. No extra hardware needed!

Data Visualization – Clean, contemporary design elements make it clear for members to visualize their finances. The system is workflow-based, rather than menu-based.

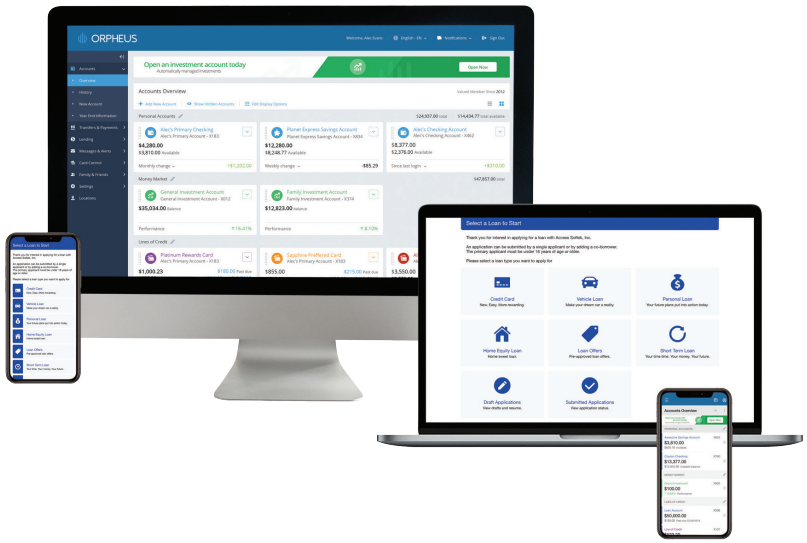

Quick Installation – Get up and running with Access Softek Digital Banking as quickly as possible through one-day Rapid Deployment feature installations.

Powerful Admin Configuration Options – Your staff will love the user-friendly admin tool. Activate new features, configure on the fly, create custom applications, and deliver our full capabilities to your members.

Targeted & Traditional Marketing Methods – Highly configurable ad real estate, secure group/individual messaging, and triggered events help share your services with a wide audience and even target specific groups or individuals.

"Access Softek's omnichannel solution, Morpheus, is one that not only checks all the boxes, but continually drives new innovative solutions to improve your members' experience. All this comes from a partner that has years of proven experience in working with Synergent to deliver reliable digital banking solutions."

Pat Mileski
Team Lead – Strategic Partnerships & Solution Support
